

LPFM should NOT be allowed priority over current FM translators, possibly forcing them off the air. AIR 1 uses these translators to serve commercial free programming to local communities throughout the country. If AIR 1 is allowed to be displaced, you will be taking away a service that provides great programming to hundreds of thousands of people. This would be a HUGE disservice to these people in local communities, some of which are smaller markets which have no other access to regional or national programming.
